

FREE ADMISSION to the OPEN HOUSE

Now you can finally experience the joy of clear hearing!

Now there's a hearing aid so advanced, it heightens your sense of hearing, and lowers your sensitivity to wearing it.

Your life of clear hearing could begin today.

There's no reason to spend another day missing out on so many beautiful sounds. If you or someone you know needs hearing help, call now for free admission to the Open House:

**Tuesday, March 15
through
Wednesday, March 16, 2011**

At the free Open House sponsored by Basin Audiology, you'll discover how innovative technology can make a real improvement in your hearing — even if you've never found help before or been told you couldn't be helped. Here's how:

The Open House three-step plan to beautiful crisp hearing:

Step 1: A free test of how you hear in background noise — the key to good hearing.

After all, it's the #1 reason most people complain about their hearing. Your exam will be conducted using state-of-the-art equipment to precisely determine how well you understand speech in background noise. That way, you can be sure your problem is correctly identified.

Step 2: Discover how to put the latest medical technology to work for you.

Recent developments in digital technology have brought you amazing new hearing aid technology. We'll show you aids that fit completely in your ear and automatically adjust for different hearing situations. So you won't have to put up with bulky machines, or struggle to hear conversation in noisy rooms.

Step 3: Buy an aid from us and save \$100.

Of course, all this advanced technology is useless if you can't afford to pay for it. So we're reducing the cost of all of our aids. Prices for hearing aids start at \$700.

Dr. Louis Du Brey, CCC-A
Clinical Audiologist

Graduate: Au.D. Arizona School Of Health Science,

Member: A.D.A., A.A.A., ASHA, S.H.H.H.

Enrollment is limited. You must call by 3/16/2011 for your free admission.

Featuring Unitron's Passport and Latitude 16 with SmartFocus™
clinically proven to improve speech understanding in noise.

Fully Digital technology from Unitron is available in the very small Complete-In-The-Canal style. You'll also receive an additional year of warranty on Passport and Latitude.

SmartFocus provides the largest clinically proven improvement in speech understanding while listening in noise in over a decade—a benefit that goes beyond directional microphones. Some of these benefits include:

- ❑ SmartFocus provides better clarity and comfort in noise. Hearing instruments with SmartFocus were shown to provide significantly more benefit and significantly reduced disability than the same instruments without SmartFocus.
- ❑ There are many sizes to choose from, including custom complete-in-the-canal and the newer light weight open ear design. With an open ear design, your ear canal remains open and you won't experience a plugged feeling. Best of all, your voice will sound more natural.

Joining us will be Mr. Phil Ovando, a Unitron factory representative who works with our office. He will provide personal consultations on their very latest advances.

With every hearing device purchased, you'll receive:

- Guaranteed results. You'll hear better or we'll refund your money.
- Scheduled semiannual check ups with unlimited office visits. Ask about our *1st Class Service* program.
- Hearing aid problems analyzed same day.
- Visa and MasterCard welcome.
